Osobine proizvoda

The KUBO is the markets first plastic alternative to the Europool-DB-Europool grid box (Gitterbox) and ideally suited for heavy goods and components, and generally for all applications with high requirements. The new Craemer box made of high-quality PE and impresses with a solid and robust construction, whilst having the advantage of a low tare weight. The KUBO runs maintenance- and trouble-free on all conventional conveyor systems and high rack warehouses, making this repairable pallet box ideal for pooling applications. Its design makes emptying, cleaning, and drying of the corrosion-free KUBO easy and straightforward. Due to its closed walls, the box offers maximum protection of the contents and boasts enormous stability and excellent stackability. The KUBO is equipped with steel reinforcements in the base, which makes it particularly well suited for heavy loads. L-shaped steel profiles on the long sides of the four-way box ensure – in addition to the additional ribs above the entry openings – increased impact protection against forklift tines.:

Spoljne dimenzije: 1240 x 835 x 973 mm

Materijal: metal grid box

Zapremina: 610 L

Masa: 51.5000 Kg

Informacije o pakovanju

Transportno pakovanje: 1

Komercijalno pakovanje: 1

Deklaracija

Naziv robe: KUBO

Vrsta robe: Box palete

Ime proizvođača: CRAEMER GMBH

Zemlja porekla: Eu

Ime uvoznika: BB packag

Zemlja uvoznika: Srbija

EAN kod (barkod): 100000034793
