Osobine proizvoda

Our plastic pallets, designed specifically in various sizes with ergonomic, modern and sturdy structures, provide practical use and storage options for long periods of time in all industries. Our pallets, produced suitable for static, dynamic and racking loads, offer economical and long-lasting solutions against all the drawbacks caused by wooden pallets, which are becoming increasingly scarce in the industry, and are compatible with transpallets, forklifts, and conveyors. Due to their high load-bearing capacities, our plastic pallets, produced in different sizes, make national and international logistics easier and more hygienic. With proper usage techniques, they offer long-term usage. Our pallet models, which can be used for almost every industry and load, provide a safe usage area for all kinds of transportation and storage needs. In addition to 2-3-5 and 6 runner production, rack loading capacities can also be increased with metal profiles. Solid, fully closed walls and perforated deck structure allows production of high and lower safety rim models suitable for different needs. Depending on the usage area, anti-slip strip applications can be applied to make forklift, transpallet, conveyor, and rack loading safer. In addition to their usage opportunities and quality, our plastic pallets can also be produced as conductive by adding ESD additive to standard PPC and HDPE raw materials, thus protecting electronic circuits and protecting production and products against explosive currents. Features such as screen printing, laser printing, sequential numbering, hot stamping, and RFID label applications can be added to our pallets, making them traceable by customers or organizations. Our plastic pallets, like all our products, can be sterilized and made ready for reuse with washing machines after each use. Thanks to the environmentally friendly recycled raw material opportunity

provided by our recycling facilities, in addition to 100% food-safe productions, production can also be carried out in different colors and qualities with mixed raw materials according to our customers' requests.:

Spoljne dimenzije: 1200x800x145mm

Materijal: HDPE

Masa: 8.8500 Kg

Statička nosivost: 3000 kg

Dinamička nosivost: 1000 kg

Regalna nosivost: 100 kg

Informacije o pakovanju

Transportno pakovanje: 1

Komercijalno pakovanje: 1

Deklaracija

Naziv robe: GA 80120 LW - 3K OD

Vrsta robe: Plastične palete

Ime proizvođača: BENO PLASTIK AMBALAJ VE KALIP
SAN.TIC.A.S.

Zemlja porekla: Turska

Ime uvoznika: bb packaging

Zemlja uvoznika: Turska

EAN kod (barkod): 100000035283
